SUMMARY

BSc CSIT graduate with strong HTML and CSS fundamentals and hands-on React experience, including a 7-day React development workshop. Built and shipped a recipe-browsing app as a personal project. Currently expanding into Python, Java, and software QA. Looking for junior frontend development or QA/testing internship opportunities.

EDUCATION

BSc in CSIT

Shreeyantra College

Completed

TRAINING

React Development Workshop

Hands-on training covering components, hooks, state management, and building real applications.

7 days

SKILLS

Core

HTML (99%), CSS (90%), React (65%)

Currently learning

Python (beginner), Java (beginner), QA / Software Testing

Tools

Git, GitHub, VS Code

PROJECTS

Recipe App — React, CSS

- Built a recipe-browsing web app in React where users can search and view recipes, built as a hands-on project during a 7-day React workshop.
- Practiced core React concepts including components, props, state, and conditional rendering.

Personal Portfolio Site — HTML, CSS, React

- Built a responsive personal portfolio with an interactive React-powered skills panel.

College Event Landing Page — HTML, CSS

- Built a responsive landing page for a college event with a mobile-first layout.

CURRENTLY LEARNING

- Software QA fundamentals — manual testing, test case design, QA process (STLC)
- Python and Java programming basics
